

## Adjusting paddle latches on aluminum C, M, S, SW & SLP Series toolboxes

Adjust the paddle latches on a C, M, S, SW or SLP, Series toolbox when...

1. There is more than ¼" of play in the lid.
2. The lid is too tight.

Open the lid and using a crescent wrench or pair of pliers, bend the tab on the striker slightly toward the lid of the box to tighten the closure of the lid

Or slightly away from the lid to loosen the lid pressure.

Apply lithium grease to the striker and moving parts of the paddle latch.
